the organization has been thorough throughout the State; has heard of its operations within the last three weeks; it was got up and kept up by the men who are disfranchised to control the colored population; the general behavior of the colored people since their enfranchisement has been good; nothing done by them, as a race, to afford any fair ground of fear of their invading the rights of the white people; the colored people have been deterred from exercising their political rights by the operations of the Klan	23
there is an indisposition to testify against those bands through fear; the republican party, and a portion of the democratic, in favor of putting down the organization	24

the offering of rewards for the apprehension of men who commit these crimes in organized bands bitterly denounced by the democratic press; it is considered a reproach for a white man to belong to the republican party; and by so doing he and his family are proscribed	40
